

NOTICE: ANNOUNCEMENT OF AVAILABILITY OF DRAFT WASTEWATER PERMIT

Permit No.: WA-002070-2

Facility: City of Langley Wastewater Treatment Plant
4999 Coles Road
Langley, Island County

The City of Langley has reapplied for a National Pollutant Discharge Elimination System (NPDES) permit in accordance with the provisions of Chapter 90.48 Revised Code of Washington (RCW), Chapter 173-220 Washington Administrative Code (WAC), and the Federal Clean Water Act.

The Langley Wastewater Treatment Plant currently operates a sequencing batch reactor (activated sludge) secondary treatment facility designed to handle an average/maximum daily flow of 0.15 MGD. The wastewater, following treatment, must meet the requirements of the Washington State Water Pollution Control Act and applicable regulations for a permit to be issued. Following evaluation of the application and other available information, a draft permit has been developed which would allow the discharge of treated municipal wastewater from the Langley Wastewater Treatment Plant into Saratoga Passage.

A tentative determination has been made on the effluent limitations and special permit conditions that will prevent and control pollution. A final determination will not be made until all timely comments received in response to this notice have been evaluated.

PUBLIC COMMENT AND INFORMATION

The draft permit and fact sheet may be viewed at the Department of Ecology (Department) website: http://www.ecy.wa.gov/programs/wq/permits/northwest_permits.html.
